

Tamper-Evident Wide Mouth Closure

A recyclable tamper-evident wide mouth closure for home care and food & beverage products

The new wide mouth closure from Jabil simplifies tamper proofing with an external tamper evidence break away band. By removing the need for an additional seal, the wide mouth closure reduces waste and improves filling and production efficiency. Our wide mouth closure is made to be recyclable while still providing secure barrier seals between the container and closure, keeping product safe and fresh. With the Jabil wide mouth closure, consumers can be confident their product is safe and sanitary without the hassle of peeling non-recyclable seals.
